

# The OpenChain Project

Japan Work Group 2022-01-21

# OpenChain Works On Making Security Better

1. The OpenChain Project, steward of ISO/IEC 5230:2020, the International Standard for open source compliance, has been at the forefront of addressing these matters. In August 2021 we responded to market demand by releasing a Security Assurance Reference Guide. The first version of this document explained how ISO/IEC 5230 could be used through the optics of security. We are now working on the second iteration of this document.
2. We will hold a Security Summit on February 17th 2022 at 17:00 PST / February 18th 2022 02:00 UTC / 09:00 CST / 10:00 JST. It will be hosted on Zoom and it will be free to attend. It will also be recorded. You can expect to come away with a clear understanding of market conditions, how the Linux Foundation is addressing them, and where OpenChain fits into the picture.
